

MATERIAL SAFETY DATA SHEET

According to Regulation (EC) No. 453/2010 and No. 1272/2008

Version #1 of 25/01/2015

GENERIC EU MSDS – NO COUNTRY SPECIFIC DATA

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifiers

Product name	BIO-PROTAN® Calcium
Product number	1120
Brand	Protan AG
REACH No.	A registration number is not available for this substance as the substance or its uses are exempt from registration, the annual tonnage does not require a registration or the registration is envisaged for a later registration deadline.

1.2 Relevant identified uses of the substance or mixture / uses advised against

Identified uses	Industrial manufacturing (all) [SU3]. Agriculture, forestry, fishery [SU1]
Uses advised against	Do not use for purposes other than those listed

1.3 Details of the supplier of the safety data sheet

Company	Protan Aktiengesellschaft, Runkelstrasse 38, LI-9495 Triesen
Phone	+423 375 15 25
Fax	+423 375 15 26
Email address	info@protan.li

1.4 Emergency telephone number

Protan AG	+423 375 15 25 (working hours);
Poison emergency call	+41 (0)44 251 51 51 (Centre Suisse d'Information Toxicologique), From Switzerland call tel. 145
	+49 (0)30 19240 (Gift-Notruf Berlin, 24 hours, language EN and DE)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

The product is classified as hazardous according to the provisions of Regulation (EC) 1272/2008 (CLP) and subsequent amendments. The product therefore requires a safety data sheet in compliance with the provisions of Regulation (EC) 1907/2006 and subsequent amendments. Further information on the risks to health and / or the environment are available in sections 11 and 12 of this Material Safety Data sheet.

2.1.1. Regulation 1272/2008 (CLP) and subsequent amendments

Classification and hazard indication	Eye Irrit. 2	H319
<small>Refer to paragraph 16 for full text of risk phrases and hazard statements</small>		

2.2 Label elements

Labelling according to Regulation (EC) 1272/2008 (CLP) and subsequent amendments

Hazard pictogram(s):		
Signal word:	Warning	
Hazard statement(s):	H319	Causes serious eye irritation
Precautionary statement(s):	P264	Wash hands thoroughly after handling
	P280	Wear eye protection / face protection

P305+P351+P338

IF IN EYES rinse cautiously with water for several minutes. Remove contact lenses, if possible and easy to do. Continue rinsing. If eye irritation persists: get medical advice/attention

P337+P313

2.3 Other hazards

This substance/mixture contains no components considered to be either persistent, bio accumulative and toxic (PBT), or very persistent and very bio accumulative (vPvB) at levels of 0.1% or higher.

SECTION 3: Composition/Information on ingredients

3.1 Substances

-

3.2 Mixture

Natural polymer (amino acids and peptides) modified by chemical hydrolysis and mixed with Calcium Chloride.

Type of formulation: liquid fertilizer, soluble in water

Chemical name	CAS no.	EC no.	Index no.	Classification (Reg. EC 1272/2008)	Content (%w/w)
Calcium chloride	10035-04-08	233-140-8	017-013-00-2	GHS07: Eye Irrit. 2; H319	≤ 22%

Refer to paragraph 16 for full text of risk phrases and hazard statements

SECTION 4: First aid measures

4.1 Description of first aid measures

General advice	If feeling unwell after first aid measures, seek medical advice. Show this safety data sheet to the doctor in attendance.
In case of skin contact	Take off contaminated clothing. Wash off with soap and running water the areas of body that may have been exposed to the product.
In case of eye contact	Flush eyes thoroughly with running water, keeping eyelids open for min 10 minutes. Remove contact lenses.
If swallowed/ingested	Rinse mouth with water. Never give anything by mouth to an unconscious person. Seek medical advice if swallowed in great quantity.
If inhaled	Move concerned person to well-ventilated area if feels unwell.

4.2 Most important symptoms and effects, both acute and delayed

Acute effect is eye irritation. The most important known symptoms and effects are described in section 2.2 (labelling) and section 11.

4.3 Indication of any immediate medical attention and special treatment needed

Treat according to symptoms. If eye irritation persist, get medical attention/advice.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable media Use water spray, CO₂, alcohol resistant foam, dry chemical, depending on the materials involved in the fire.

Unsuitable media

None in particular. Use water jets only to cool the surfaces of the containers exposed.

5.2 Special hazards arising from the substance or mixture

Liquid product is not reactive and not flammable. If involved in a fire can emit toxic fumes: carbon oxide and nitrous vapours, ammonia, hydrogen chloride (HCl) gas, toxic pyrolysis products (see section 10). Do not breathe in combustion products.

5.3 Advice for firefighters

Use self-contained breathing apparatus and suitable protective clothing.

5.4 Further information

Dispose of contaminated fire extinction water and fire remains according to applicable national and local regulations.

SECTION 6: Accidental release measures
6.1 Personal precautions, protective equipment and emergency procedures
General advice

Always ensure your own safety first. Use proper equipment as indicated in section 8.

For non-emergency personal

Follow safety precautions and act according to the rules of hygiene and good industrial practice.

For emergency responders

Wear gloves and protective clothing and avoid contact with eyes and skin. Provide sufficient ventilation and wear respiratory protection in case of vapour release. Evacuate the danger area. If necessary, consult an expert. In case of fire, wear respiratory protection and eliminate all unguarded flames and sources of ignition.

6.2 Environmental precautions

Do not let product enter drains, sewers, surface water, ground water. If the product has entered a watercourse in sewers or has contaminated soil or vegetation notify it to the authorities.

6.3 Methods and material for containment and cleaning up

Recover the product for removal. Possibly absorb it with liquid-binding material (earth, sand, diatomite, acid binders, universal binders, sawdust).

Keep in suitable, labelled and closed container for disposal in accordance with regulations. After wiping up, wash with water the area and materials involved.

6.4 Reference to other sections
For emergency contact info

see section 1

For personal protection

see section 8

For waste disposal

see section 13

SECTION 7: Handling and storage
7.1 Precautions for safe handling
Technical measures/precautions

Avoid contact with eyes, skin and clothing and avoid inhalation of vapours. When diluting, always stir the product into standing water. Keep containers tightly sealed. Do not store in open or unlabelled containers.

General occupation hygiene

Handle in accordance with good industrial hygiene practice and observing general safety regulations for handling chemicals: Do not eat, drink or smoke in work areas. Wash hands after use. Remove contaminated clothing and protective equipment before entering eating areas.

7.2 Conditions for safe storage, including any incompatibilities

Technical measures/storage conditions

Keep in original container closed tightly. Do not store in open or unlabelled containers. Normal storage conditions without particular incompatibilities. Keep containers upright and safe avoiding possibility of falls or collisions.

Storage compatibility

Store separately from food and animal feed.

Additional disclosures on stock conditions

Store in a cool place, protect from frost and sources of heat.

Storage class

Non combustible liquid.

7.3 Specific end use(s)

Fertilizer. Not classified as dangerous. No other specific uses are stipulated apart from the uses mentioned in section 1.2

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Recommended occupational, consumer and environmental exposure limit values

Applied to Calcium Chloride
SAEL (Solway Acceptable Exposure Limit 2003): TWA/8h = 10 mg/m³

8.2 Exposure controls

Personal protective equipment

See product label for hazard details. Handle in accordance with good industrial hygiene practice and the usual precautionary measures for handling chemicals:

- Eye/face protection

Use protective goggles with side shields. In case of spray mist use protective goggles. We recommend tested and approved equipment for eye protection EN 166 (EU).

- Hand protection

Handle with gloves. For full and splash contact we advise the use of "Nitrile Rubber Gloves (NBR)", minimum layer thickness of 0.11 mm. Inspect gloves prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with the product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Wash and dry hands. The selected protective gloves have to satisfy the specifications of EU Directive 89/686/EEC and the standard EN 374 derived from it.

- Skin and body protection

The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.

- Respiratory protection

For nuisance exposures use type P95 (US) or type P1 (EU EN 143) particle respirator. Use respirators and components tested and approved under appropriate government standards such as NIOSH (US) or CEN (EU).

Control of environmental exposure

Minimize product release in the environment. Avoid product enter drains.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance, form	liquid	Vapour pressure	not determined
Appearance, colour	yellow ochre	Vapour density	not determined
Odour	undefined	Relative density	1,18 – 1,20 kg/l
Odour threshold	not applicable	Water solubility (ies)	soluble
pH value at 20°C (solution 1:10)	4,5 – 5,5	Partition coefficient: n-octanol/water	not determined
Melting point / Freezing point	not determined - 2 °C	Auto-ignition temperature	not determined
Initial boiling point and boiling range	not determined	Decomposition temperature	not determined
Flash point	not applicable	Viscosity (dynamic at 20°C)	not determined
Evaporation rate	not applicable	Explosive properties	not determined
Flammability (solid, gas)	not self-igniting	Oxidising properties	not determined
Upper/lower flammability or explosive limits	not explosive	Vapour pressure	not determined

9.2 Other safety information

No further relevant information available.

SECTION 10: Stability and reactivity

10.1 Reactivity

No reactivity hazards.

10.2 Chemical stability

Stable under recommended storage and handling conditions. No decomposition associated with the proposed use. The product contains no preservatives and is stable when stored undiluted in clean containers and if handled according to label directions. With decreasing shelf life, a slight precipitate is possible without changing product quality. (see section 7, handling and storage).

10.3 Possibility of hazardous reactions

To our knowledge, the product does not present particular risk under normal conditions of use. For further information, refer to section 10.5.

10.4 Conditions to avoid

Avoid storage in open containers and with temperatures above 30°C and less than 10°C.

10.5 Incompatible materials

Do not store together with strong reducing agents, elementary metal compounds, acids and alkalis. With strong oxidant agents like oxidant mineral acids, organic peroxides, organic water peroxides, elementary metals, exothermic reactions can occur. Apply cautiously in combination with copper, mineral oil based products and sulphur products.

10.6 Hazardous decomposition products

In the event of fire, refer to section 5.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity:

Acute oral toxicity:	no data available
----------------------	-------------------

Acute dermal toxicity:	no data available
------------------------	-------------------

Acute inhalation toxicity:	no data available
----------------------------	-------------------

Local effects:

Skin irritation:	no data available
------------------	-------------------

Eye irritation:	If brought in contact with eyes the product causes significant irritations which may last for more than 24 hours.
-----------------	---

Skin sensitisation:	no data available
---------------------	-------------------

Other:

Sub-acute toxicity:	Negative
---------------------	----------

Mutagenicity:	Negative
---------------	----------

Reproductive toxicity:	Negative
------------------------	----------

Carcinogenicity:	Negative
------------------	----------

Additional information	Calcium Chloride: LD ₅₀ (rat): Oral > 3'789 mg/kg body weight LD ₅₀ (rat or rabbit) Dermal > 5'000 mg/kg body weight
------------------------	--

SECTION 12: Ecological information

12.1 Toxicity

The product is a fertilizer and does not cause adverse effects in the environment if handled according to the advised dosages and the recommendations of use. Low concentrations discharged correctly into adapted biological sewage treatment plants do not interfere with degradation activity of activated sludge. Handle according to good industrial hygiene practice, avoid dispersal in the environment. Inform competent authorities in case of waterways, sewers, soil or vegetation contamination

12.2 Persistence and degradability

No data available.

12.3 Bio accumulative potential

No data available.

12.4 Mobility in the soil

No data available.

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not carried out.

12.6 Other adverse effects

No data available.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Unused product	Recover if possible. Dispose of surplus and non-recyclable solutions by a licensed disposal company following the local regulations. Handle in accordance with good industrial hygiene practice and the usual precautionary measures for handling chemicals.
Contaminated packaging	Do not reuse empty containers. Dispose as unused product. Do not remove label until container is thoroughly cleaned.

SECTION 14: Transport information

The product is not considered dangerous with respect to the scope of application of the regulations concerning the transport of dangerous goods by road (ADR); by rail (RID); by air (ICAO / IATA); by sea (IMDG).

SECTION 15: Regulatory information

Hazardous substance or mixture according to Regulation (EC) No. 1272/2008 (Regulation on classification, labelling and packaging of substances and mixtures).

BIO-PROTAN® Calcium is produced and marketed according to the following regulations:

Regulation (EC) No. 1069/2009 laying down health rules concerning animal by-products not intended for human consumption and Regulation (EC) No. 889/2008 laying down detailed rules for the implementation of Regulation (EC) No. 834/2007 (Organic production and labelling of organic products with regard to organic production, labelling and controls).

This safety data sheet complies with the requirements of Article 31 of EC Regulation 1907/2006/EC (REACH regulation) and the information contained herein is displayed in the order prescribed in Annex II to that regulation as amended in the year 2010 (435/2010/EC).

The purpose of this safety data sheet is to facilitate the carrying out of a risk assessment. We remind employers of their duty to carry out such an assessment and subsequently to provide an appropriate working environment. It is the employer's duty to procure all necessary personal protective equipment and ensure that all workers handling the product use such equipment.

15.1 Safety, health, and environmental regulation specific for the substance or mixture

Restrictions in relation to the product or contained substances pursuant to Annex XVII to Regulation (CE) 1907/2006	None
Substances in candidate list (Art 59 REACH)	None
Substances subject to authorization (Annex XIV)	None
Sanitary control	Workers exposed to chemicals are subject to the control of health authorities following the national and local regulations.

15.2 Chemical safety assessment

No chemical safety assessment required or carried out by the supplier of the product.

SECTION 16: Other information

Legal notice

This Material Safety Data Sheet (MSDS) is additional to the Technical Data Sheet (TDS) but does not replace it. The MSDS contains guidance on the safe handling, use, processing, storage, transportation and disposal of the product. This document relates to the original product BIO-PROTAN® Calcium and may not be valid for the formulation or combination with other materials or in any process. The product is developed and tested for the specified uses and should not be used for any other purposes. Any other use may involve risks. The user will take sole responsibility for the precautions relating to the use of the product. The information in this MSDS is applicable to the product with regard to appropriate safety precautions and is not intended to guarantee any particular properties. This document is not to be considered a warranty or quality specification.

The information in this document is reproduced according to the recommendation of the EFMA form (European Fertilizer Manufacturer's Association). The information does not pretend to be all-inclusive and is given to the best of our knowledge at the date of publication. Protan AG does not accept any liability with regard to the contents of this document and shall not be held liable for any damage resulting from unsafe handling or from contact with the product.
